"competition"

Honesty and humility in the face of the data:

- **how linguists reason about data patterns;**
- the tension that arises from the complementary goals of developing a theory of Universal Grammar and accounting for the diversity of the world's languages; and
- once again, the idea that our minds construct linguistic representations—the analysis is not “in the signal”.

The enormity of the task facing us in arguing for universal grammar . . .

- If they are necessary, why are they ignored in determining case in other languages?
- Can a phenomenon like ergativity be correlated with culture/worldview?
 - Think about split systems

ergativity

Syntax-
morphology
"competition"

- Does theory need all these categories?
 - Grammatical functions like SUBJECT and OBJECT
 - Morphological Case forms like NOMINATIVE and ACCUSATIVE
 - Thematic roles like AGENT and THEME
 - Syntactic categories like N, NP, V, VP
- If thematic roles are unnecessary, what is going on in Lakhota?
- If they are necessary, why are they ignored in determining case in other languages?
