and if we answer YES

- What will we find?
- Is there any reason to think our conclusions will conform to our pretheoretical intuitions?

Sir Arthur Eddington, *New Pathways in Science*, 1934

Language as a
natural
object?

I-language

Philosophical
Issues

Physical science now deliberately aims at presenting a new version of the story of our experience from the very beginning, rejecting the familiar story as too erratic a foundation.

Zenon Pylyshyn (1984), *Computation and Cognition*:xxii

Language as a natural object?

I-language

Philosophical Issues

"[I]f you believe P, and you believe that P entails Q, then even if Q seems more than a little odd, you have some intellectual obligation to take seriously the possibility that Q may be true, nonetheless"

Some general questions about language

Language as a
natural
object?

I-language

Philosophical
Issues

- What do we use it for?
- How is it acquired? Learning/innateness?
- How is it instantiated in the brain?

Some general questions about language

Language as a
natural
object?

What is the Warlpiri plural rule?

Language as a
natural
object?

I-language

Philosophical
Issues

- What is the sound of the Warlpiri plural?
- It is a variable x , such that x has the same form as the Noun it is added to.

Some lessons about language based on Warlpiri plurals

Language as a natural object?

I-language

Philosophical Issues

- Some aspects of language are 'simply' memorized— *kurdu* means 'child' in Warlpiri but *child* means 'child' in English.
- Some aspects of language involve rules or patterns.
- If there are rules, they have to apply to some kind of input and produce some kind of output—the units of language can be quite abstract.
- The rules apply to elements that are only definable in linguistic terms—for example, the Warlpiri plural rule applies to nouns, not verbs, and the noun-verb distinction is a purely linguistic one.

Representing syllable sequences

- a. $\sigma_2 \sigma_1$
- b. $\sigma_3 \sigma_2 \sigma_1$
- c. $\sigma_n \dots \sigma_2 \sigma_1$

Rule (tentative)

If $\sigma_n \dots \sigma_2 \sigma_1$ is a SG, then the PL is $\sigma_n \dots \sigma_2 \sigma_2 \sigma_1$

The language faculty can copy and concatenate

- Reduplication: $x \rightarrow x \hat{\ } x$
 - Warlpiri: x is a SINGULAR
 - Samoan: x is second to last syllable of a SINGULAR

The language faculty can copy and concatenate
